PROFESSIONAL PROFILE

Final-year Bachelor of Science in Information Technology student at Bukidnon State University (expected graduation: School Year 2026–2027) with a career focus on Quality Assurance. Gained hands-on QA experience as the Quality Assurance member and assistant leader of ChainGuard, a completed capstone project, by creating test cases, testing features manually, reporting defects, and retesting fixes. Adds data analytics, graphic and UI/UX design, and front-end web development to this foundation, built through coursework, research, and AI-assisted learning. Looking for an internship where I can apply and grow my testing skills while contributing to a real project team.

EDUCATION

Bukidnon State University Expected Graduation: 2027 (SY 2026–2027)

Bachelor of Science in Information Technology

- Consistent Dean's Lister since 1st Year, 2nd Semester
- Relevant coursework: Quality Consciousness, Habits and Processes; Business Analytics; Systems Administration and Maintenance
- Capstone project: ChainGuard (Quality Assurance & Assistant Leader)

Bukidnon National High School Graduated 2023

Senior High School, Information and Communications Technology (ICT) Strand, TVL Track

- Graduated With High Honors

PROJECT EXPERIENCE

ChainGuard Completed

Capstone Project, Bukidnon State University · Quality Assurance & Assistant Leader

A blockchain-based system for tamper-evidence and integrity verification of digital evidence.

- Reviewed system requirements and functionality, then wrote test scenarios and test cases for the system's features.
- Tested features manually, compared expected vs. actual results, reported defects, and retested after fixes to confirm they were resolved.
- Checked database records with SQL/database tools to verify data integrity.
- Used Postman for testing, Excel/Google Sheets for tracking test results, and GitHub for version control and teamwork.
- Researched and proposed the tools and integrations used to build the system.
- Supported the team leader as assistant leader while carrying out the QA role.

My testing process: *Review requirements → Design test cases → Run tests manually → Compare expected vs. actual results → Report defects → Retest after fixes*

QA DOCUMENTS PRODUCED

- **Test Plan** — outlines what is tested and how testing is organized.
- **Test Case Document / Checklist** — the test cases and checks performed on each feature.
- **Bug / Defect Report** — records the defects found so the team can fix them.
- **Test Execution Report** — summarizes the results of the tests that were run.

SKILLS

Quality Assurance	Manual Testing · Test Case & Test Scenario Design · Test Planning · Defect Reporting · Expected vs. Actual Result Checks · Retesting · Requirements Review · Data Integrity Checking · Test Documentation
Tools	Postman · GitHub / Git · Excel / Google Sheets · SQL / Database Tools
Data & Design	Data Analytics · Graphic Design · UI/UX Design
Web Development	Working knowledge of HTML · CSS · JavaScript · PHP · Laravel · MySQL · PostgreSQL — built through coursework, research, and AI-assisted learning, always verifying underlying logic through hands-on debugging and manual testing
Professional	Team Collaboration & Leadership · Research · Customer Handling

WORK IMMERSION

Ultimate PC, Malaybalay City 2nd Semester, SY 2022–2023
Work Immersion Student (ICT)

- Applied PC hardware skills learned in the ICT strand in a real workplace.
- Practiced professional customer handling and service.

CERTIFICATIONS

Introduction to AI Literacy and Responsible Use Mapúa University & Arizona State University
CCNA: Switching, Routing, and Wireless Essentials Cisco Networking Academy
CCNA: Introduction to Networks Cisco Networking Academy

ACHIEVEMENTS & LEADERSHIP

- **Winner (Team), DIGIMC Quiz Bee 2026** — a technology/IT quiz bee held at Malaybalay City New City Hall.
- **Consistent Dean's Lister** since 1st Year, 2nd Semester, Bukidnon State University.
- **Graduated With High Honors** — Senior High School, ICT Strand, Bukidnon National High School.
- **Assistant Leader / Leader** in group projects and class activities, including the ChainGuard capstone project.

INTERESTS

Pattern Recognition & Analysis: Outside coursework, I study multi-timeframe chart structure on demo market feeds. This self-study reinforces disciplined rule-following, patience, and visual pattern recognition—habits that carry directly into finding subtle software defects and edge cases.
